Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *23 March 2004*.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1-11* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Jonasson et al. Jonasson discloses a valve including a bending deflectable piezoelectric transducer actuating element 22, a sealing element 24, a sealing contour 16, 36, and an elastic element 32 whose force is directed vertically which is perpendicular to the bending motion of transducer 22 which is into and out of the page in figure 1 on axis 30 as shown in figures 2a and 2b, wherein the sealing element 24 laterally swings across the surface with apertures 16 and 36 as shown in figures 2a and 2b with the axis of the swing being a vertical axis at 26 or the base of the transducer 22 in figure 1 which axis is perpendicular to the direction of deflection of 22 as claimed and as shown at horizontal axis 30 in figures 2a and 2b which is into and out of the page in figure 1.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boecking and Cotton et al., teach other valves with bending piezoelectric transducers but having sealing elements, 11 in Boecking and 160 in Cotton, that vertically reciprocate and thereby do not "swing around an axis" as called for in claim 1. Frisch et al., and Berger et al., teach other valves with bending piezoelectric transducers but having the sealing elements swing on an axis, and the

axis of the force of the springs being parallel to the bending motion of the transducer and not perpendicular as claimed.

4. Claims 2-4, 6-8, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Wed. thru Fri. 9AM-7PM, Mon. 7AM-1PM.
